USIB Committee on Berlin Situation:

11. I/GM prepared a critique of a position paper "Evidence of Soviet Missiles in East Germany" written by the Special USIB Committee on the Berlin Situation. This paper was submitted to I/GM immediately prior to its approval by the Special Committee. Inasmuch as the article presented evidence accumulated over an eight-month period, with the most recent date of information March 1959, it was requested that publication be delayed briefly to permit proper evaluation. This could not be arranged with the result that the published article was both inaccurate factually and misleading in tone. Steps are being taken to insure that in the future adequate time is allowed for I/GM to review publications dealing with Soviet guided missile production or deployment which the Committee wishes to have co-ordinated by ORR.

C. Inter-Agency Support:

[REDACTED]
